**WHAT IS A COMPETENT PERSON?**

A “Competent Person” is one who is capable of identifying current and potential workplace hazards, or conditions, which are dangerous to employees. A competent person also has the authorization to take prompt corrective measures to eliminate those conditions or hazards. This class is for anyone working at heights, and their safety managers &/or supervisors who will be responsible for the company's Fall Protection program and work guidelines. All job sites should have at least one Competent Person present at all times. Our Qualified Person Training is for Supervisors and Department Managers. The course includes a review of engineered systems and advanced equipment demonstrations.

*Offering Customized and Standard Fall Protection, Confined Space and Rescue Classes On-site or In-house*
