The **Unique Lift** is a manually propelled and operated lifting machine capable of performing a wide range of material handling tasks. It has the capacity to safely lift and move loads of up to 1200 lbs, to a height of 12 feet.

The **Unique Lift** is targeted at a broad customer base including users in commercial, construction and institutional markets. As well to an ever expanding industrial user base, as a work positioner or work-in-progress handler, where non-combustion powered machines are becoming the standard due to workplace considerations such as noise or fumes.

It is especially useful for those smaller companies that may have the requirements for occasional or medium duty lifting and that may not have access to dock level loading.

**QUALITY** • All products manufactured by Unique Concepts Ltd. are ruggedly constructed and designed for safety, strength and dependable long-lasting use.

**ECONOMICAL** • The **Unique Lift** can be used by many businesses to significantly save time and reduce work related injuries. Lift is manually propelled and operated.

**LIGHTWEIGHT** • Aircraft aluminum mainframe construction provides high strength to weight ratio and ease of portability.

**VERSATILE** • Various attachments allow for use in a wide range of material handling and work positioning tasks.

**DURABLE** • All-aluminum welded main structure powder-coated in high visibility colour for extra resistance to chipping and scratching.

**SAFETY** • Lifting mechanism consists of a one speed integral custom braking winch driving a double chain which allows for the safe lifting of loads of up to 1200 lbs.

**CUSTOM** • Many custom applications are also available on the **Unique Lift** standard base. Please call us for a quotation.
